

EDF TASK FORCE ON THE ACCESSIBILITY ACT

EDF is establishing a temporary Task Force to ensure that EDF members work together efficiently to promote the adoption of the European Accessibility Act and that the views of persons with disabilities are taken into account in the process of adoption. The Task Force is needed to lobby the EU institutions effectively and will facilitate EDF's work by sharing information and coordinating actions.

If your organisation is working on the Accessibility Act, **you can nominate an expert to participate in the Task Force**. Participants will be familiar with the legislative proposal on the European Accessibility Act and EDF's position. Ideally, participants are already working on the Accessibility Act as part of their role in their own organization and have a high level of expertise on the subject.

Please note that all the information about the Accessibility Act will be shared with all EDF members regularly via Members' Mailing.

The expert should be nominated by a member organisation of EDF. You can send your nominations directly to the EDF secretariat.
