Dear Gisèle and Pierre,

Sorry, I am writing to you in English since I put in copy one of my colleagues from Fundacion ONCE. I really hope that my e-mail finds you well and I was really happy to meet with you (briefly..) during EDF AGA in Dublin.

I am contacting you this time in order to introduce to you a project that my colleagues are implementing through the Erasmus+ programme, together with the University of Antwerp. It is a project focusing on secondary education for children with disabilities and they are planning to do a mission to Belgium in order to promote it and make sure that they find a good number of families and students that would be interested. We have discussed, and they would like to start their mission by visiting you and by asking you for some ideas for the implementation of the project.

I forward to you below some information in English that they have provided explaining the purpose of the trip. I would be very thankful if you could find some minutes to meet with them and eventually provide them with some ideas prior to the meeting.

I copy them into this e-mail for further information if required.

Many thanks in advance and I am really looking forward to meet with you very soon.

Best

Javier

Javier Güemes
