Dear Catherine

I'm fine, thank you. And you ?

You come with this at the right moment as we have a Board meeting on Tuesday afternoon. So you could give them my contacts (see my signature). If they could send me a presentation for Monday morning it would be perfect (English, French Dutch will do. Japanese will be a bit more complicated as my vocabulary is restricted to eating 😊)

I will submit their request to the Board and they will decide if we transfer it to our members or suggest some other contact.

Interesting to know that some companies are willing to act in these fields.

I wish you a very pleasant week-end.

Subject: Toyota

Dear Olivier

I hope you are doing very well; we have been in discussion with Toyota about cooperation and they would like to cooperate with organizations of persons with disabilities in Belgium in addition to their interest on European issues; they wanted us to put them in touch with DPOs in Belgium and so I wanted to consult with BDF.

The issues that they are interested to work on include employment, Disaster Risk Reduction and preparation with a focus on mobility, and mobility for all. Would you like us to put the colleagues in Toyota directly in touch with the BDF or directly with members of yours or other organizations? Ideally we could reply to them quickly because they are searching for partners and it would be better not to keep them waiting too long if we could.

Warm regards

Catherine
