Objet : EDF Board Monday mailing- Disability Platform and Road Safety

Dear Board members,

Road Safety:

On March 28, EDF will give a short presentation to the European Commission's High Level Expert Group on Road Safety to present what the main challenges and demands for persons with disabilities in this field are. Some the potential topics that EDF could refer to are the accessibility of transport infrastructure and emergency services, the impact of new types of vehicles on pedestrians with disabilities (bikes and e-scooters), the adaptation of private vehicles or access to driving licence.

Since this is not one of our traditional areas of advocacy, we would like to kindly ask you, in case your organisation is active in this field, if you know of any specific topic, evidence, initiative or specific demand that you think we should raise in this meeting.

If you have any input or wish further information, you can e-mail Daniel Casas – EDF Accessibility Officer (daniel.casas@edf-feeph.org)

Events wise this week is not too intense. Our team are working with our Ukraine members on a webinar on accessibility. Later in the week, on Thursday we have our regular meeting with European members, focussing this thursday on the European Parliament of Persons with Disabilities.

Warm regards,

Catherine
