Objet : ICTEG - Call for speaker

Dear ICT experts,

Would any of you be interested in giving a presentation at a conference “Technology and Digitalisation in social care”? On 4th–5th October 2018 in Barcelona. They look for a DPO / OPD (organization of persons with disabilities) perspective.

Here brief description of the panel in which you would speak:

What are the rules and procedures that facilitate the uptake of technology?

The panel will look at good examples of national and international legal and ethical frameworks to support the adoption of Person-Centred Technology by the social care sector.

Conference description: On 4th–5th October 2018 EASPD, in cooperation with local service providers, will be organising an international conference in Barcelona at Caixa Forum. The conference “Technology and Digitalisation in social care” will look at the how technology and digital solutions impact the social care sector.

By bringing together service providers for persons with disabilities, technology business providers and disabled people’s organisations, participants will get an insight of the available promising practices and key factors in the design and adoption of person-centred technology products and services. Participants will also have an understanding of the main barriers and obstacles that need to be overcome for a full deployment of technology in care and supports services, as well as an overview of legal and ethical frameworks that facilitate the use of person-centred technology in the sector.

If any of you is interested, please let us know.

Thanks!

Alejandro Moledo
