

EDF – EAA -Peer support meeting 1

11/02/2021

Résumé OME :

Bonjour

J'ai participé au Peer meeting EDF sur EAA. Voici mon feed-back, très schématique :

- 45 participants
- Très difficile de prendre des notes : percevoir qui parle, de quel pays, sur quel aspect technique...
- Le rapport EDF sera bienvenu
- Pays les plus actifs :
 - Norvège, bien avancé dans le processus de transposition. Bon côté participation
 - Danemark, participation conseil national dans un GT... Beaucoup de problèmes Difficile car très technique et peu d'ingénieurs conscients des besoins d'accessibilité
 - Pays-Bas, compliqué. Paiements électroniques très répandus, mais ils doivent être adaptés. Les manufacturiers ont besoin de temps pour adapter leur « hardware ». Propose la création d'un groupe de travail, mais n'ont pas la capacité de prendre le lead. Qui peut le faire ?
 - Allemagne : processus législatif a pris du retard. Espèrent que la loi sera prête avant les élections de septembre
 - Belgique : j'ai pris la parole :
 - 2020, année « blanche » pour la transposition, malgré nos interpellations
 - Lead bicéphale
 - Grosse inquiétude = appel d'offre pour les machines de vente SNCB
 - Merci pour ce peer review
 - Espagne : importance des processus de standardisation. Vous devez-vous y impliquer = seule solution car les industriels ont besoin des normes de mise en œuvre pour l'EAA
 - Alejandro : le standard le plus important sera le ePub3
 - Mher : le BDF a demandé à Marie de créer une « check-list »... vont voir en interne
 - Prochaines réunions = 1^{er} juillet & 26 octobre (?)
 - Alejandro : plusieurs compagnies « ICT » souhaitent financer un webinar public sur EAA : le 20 mai

- Prendre contact avec elle pour la société qui développe des terminaux prototypes (Mathieu)

Ma conclusion : nous devons mieux comprendre l'articulation « législation – standardisation »

Notes OME

Norway : point of situation, Cato = positif

Belgium : Olivier,

??? : point of situation, Mia Ahlgren, one person from them in the comity. Same problem as Belgium : nobody wanted to take the lead. Finally, it's social affairs. I'm one of the expert. I feel very lonely to know about accessibility. Lots of problems related to article 14... Lots of interest in the e-books. I would welcome exchanges on informations. We use to do a lot in information and not a lot about enforcement

Netherlands : Jolanda Koenen, bancontacts = accessible, ticketing machines not good. Every One Included established a framework with several interest groups. Proposal from the commission: working group second half of 2020. Many payment machines : they must be fully accessible for . Suppliers need much time to adapt their hardware. We are worried. Prepared a letter of such a working group. We don't have the capacity to take the lead. Who would like to take the lead ? Answer before end February.

- **Prendre contact avec elle pour la société qui développe des terminaux prototypes (Mathieu)**

Mher : who is interested contact me and I will

Pilar Orero, Spain : pay attention to a project on accessible platform in EU

- Join the standardization : we need to have standards ready and there is almost no one from users there
- EU started a network "Acxos (?) about standardization. Our leader is Klaus. There is money to organize seminars... Please joins

Spain : Hernandez Galan Jesus, going to translate in Spanish (?)

Germany : Merve Sezgin, Germany is late. They want to finish before election in September. Text of the law very soon. Mia asked to share it with everybody

Antoine Fobe : Germany : payment terminals is a key element. Yolanda proposed a EBU work group on payment

Mher : do people ask questions , please do

- Netherlands : lead = ministry of transport, can we make pressure
- Alessandro : having social affairs = interesting ... in the end it will
- Alessandro : group on payment terminals (Yolanda) - interesting to have all the info together. We have to channel through the standardization in June. We have to have all our recommendations in the standard. National have to send to standardization committee national. Important to have you in the national standard committee and especially in the mirror committee... See Jolanda Koenen
- Mia Ahlgren : Social affairs is not necessarily the best as the action will have to be in other ministries. We think that the ministry dealing with consumer issues would be better
- Alejandra : the commission will publish a draft commission request to produced a harmonized standard. We will see in June which products will be covered. CE has 2 options
 - Include in a standard which is heavy
 - Technical specification = other system out of standardization process
 - Too blur for me !!!
- Mia The standard will be EPUB3 or a new one?
- Alejandro : MIA, ePub3, yes
- Jane Richards:
- Alejandro : we'll need the standard for the payment machine to say how the the manufacturers have to

- Mher: BDF proposition for a short document from EDF like a check-list...
- Mher : follow-up with a FB group + a e-mail group. Will send a
- Mher : next = 1st of July and then 26th October
- Alejandro : we have been in contact with ICT companies. They want to fund a public webinar on EAA. It will be on the 20th May
- Mary : we are happy to support you in national meetings, also if you want to join in meetings with ministers...
- Mher : photo
